Frontend Developer [FE26AXR]

TWIPLA is a world-leading website intelligence platform with extensive functionality for the statistical collection and behavioral analysis of website visitors, all delivered to the highest data protection standards. The platform enables website operators, digital marketers, and demand specialists to clearly identify what works and what doesn't, helping them continuously improve their website(s).

Founded in 2016, **TWIPLA** has offices both in Munich, Germany, and Cluj-Napoca, Romania, with active users in more than 190 countries worldwide.

With privacy-by-design, **TWIPLA** has developed a unique, innovative, and proprietary solution that requires zero cookies for tracking data.

The platform fully complies with global data privacy regulations, including GDPR and CCPA, with no data shared with third parties.

More than 2.5 million websites have already installed **TWIPLA** to improve website performance, better understand visitor behavior, and create a consistently positive customer experience.

TWIPLA offers a free package that allows any user to explore the analytics platform without commitment, upgrading to a paid subscription only when needed. With a comprehensive suite of website statistics, behavioral analysis tools, and communication features, websites gain clearer insights and stronger decision-making.

With over 1.13 billion websites worldwide, an increasingly competitive digital landscape, and an ever-growing focus on data privacy, the website intelligence provided by **TWIPLA** will be in high demand for years to come.

We are looking for a skilled **Frontend Developer** proficient in React.js and TypeScript to join our development team. In this role, you will collaborate with cross-functional teams to design, develop, and maintain user interfaces for our web application.

Everything takes place in a very flat hierarchy – with everyone closely working together around our common goal of building the #1 analytics application on the planet.

Key Responsibilities:

- Work closely with developers to translate UI/UX designs into responsive web pages using React and TypeScript.
- Develop new user-facing features and optimize existing ones to enhance the overall user experience.
- Write clean, efficient, and maintainable code that follows best practices and coding standards.
- Collaborate with QA engineers to ensure the quality and reliability of front-end components.
- Participate in code reviews and provide constructive feedback to peers.
- Stay up to date with front-end development trends, technologies, and best practices.
- Actively contribute to improving development processes and workflow.

Core skills:

- 2+ years of experience in front-end web development with a strong focus on React and TypeScript.
- Solid understanding of HTML5, CSS3, and responsive design principles.
- Familiarity with RESTful APIs.
- Ability to work independently and as part of a team in a fast-paced environment.
- Experience with TypeScript is a plus.
- Familiarity with Agile development methodologies.
- Ability to identify and solve problems independently & pro-actively.
- Strong analytical and problem-solving skills, with the ability to diagnose, track, and communicate issues effectively.
- Detail-oriented mindset, with a commitment to delivering high-quality work within deadlines.
- Ability to adapt to changing priorities and work effectively in a fast-paced, agile development environment.
- Exceptional written and verbal English communication skills.
- Nice to have: Bachelor's degree in Computer Science, Engineering, or a related field, or equivalent work experience.

Things we can guarantee:

- Competitive salary based on experience.
- Engaging projects with cutting-edge technologies.
- Long-term role with stable projects and clear ownership.
- Support for your development through courses.
- Possibilities to participate in the company's growth.
